

HOPPERTOP

Weigh Hopper Venting Filter

THE TOP CHOICE FOR HOPPER VENTING IN CONCRETE PLANTS

HOPPERTOP is a COMPACT air filter specially developed for venting of mechanically loaded cement weigh hoppers in concrete plants.

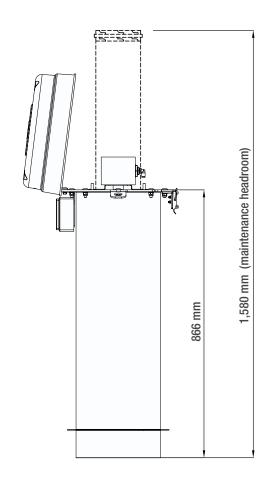

Dust which is separated from the air flow by a single patented WAM® cartridge filter element drops back into the hopper after an integrated automatic reverse air jet cleaning system inside the weather protection cover has removed the dust particles from the filter elements.

Features

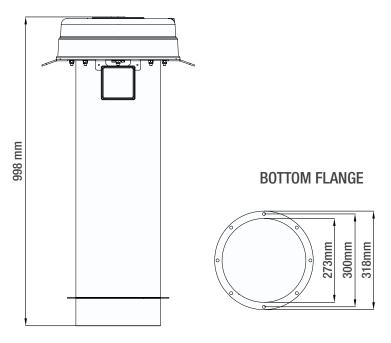

- Compact dimensions
- Stainless steel design
- Hinged cover

- High-performance quality filter cartridge
- Cartridge removal without tools

Overall Dimensions

MODEL	TYPE	FILTER SURFACE (m²)
HTP10001V	VENTING	1
HTP10001R	FLANGE CONNECTION	1

Benefits

Maintenance height: 870mm

Durable stainless steel design

Easy maintenance thanks to hinged top cover and cartidge removal without tools

Small footprint, easy to handle

Durable thanks to special cartridge pleat geometry

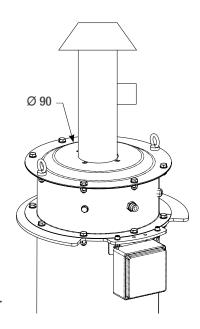

High-efficiency filter media compliant with international dust emission directives

Accessories

Pipe Connection Module

- Required for dust emission sampling connection or suction duct
- Robust powdercoated steel cover
- Easy replacement with weather protection cover

Electronic Differential Pressure Meter

- Filter ΔP continuously measured and displayed on 3-digit display;
- Cleaning activation through pressure threshold;
- Alarm pressure can switch on external device;
- 4-20 mA exit to read ΔP value on plant PLC;
- Possible to retrofit on existing filters.

Applications

Typical Application:

Venting of mechanically filled cement weigh hopper in concrete batching plant
