

Butterfly Valves VFS

EC 1935/2004-certified

MILLIONS OF UNITS OPERATING WORLDWIDE

VFS Butterfly Valves are among the most frequently used shut-off devices worldwide for closing bulk material silos, hoppers or containers and for interrupting the flow in both mechanical and pneumatic conveying of powdery or granular materials.

Due to their special design and engineering materials used, they represent a particularly cost-effective yet most efficient solution. For the food industry, a version with stainless-steel disc and an FDA and EC 1935/2004-compliant integral seal is available

Benefits

Highly abrasion-resistant due to specific component design

Interchangeable discs

Delivery from stock of WAMGROUP® subsidiaries worldwide

Time-saving maintenance

Easy to fit

Optimum price-performance ratio

Technical support and worldwide availability of spare parts thanks to the WAMGROUP® subsidiary network

Technical Features

- V1FS with top flange and beaded bottom section suitable for fixing of flexible sleeve
- V2FS with identical top and bottom flange
- Dust-tight and pressure-proof up to 0.2 bar (2.9 PSI)
- High-pressure aluminium alloy die-cast semi-bodies
- Disc in cast iron, SINT® engineering polymer, or stainless steel
- Gaskets for both standard and food-grade applications
- Few components
- Lightweight and easy to handle

Application

ACTUATOR COMPATIBILITY
