• Worldwide leader in vibration technology

OLI is **the world's top selling manufacturer of Electric and Pneumatic Vibrators**. A high level of customer service is guaranteed through 20 OLI Trading Subsidiaries, 70+ local warehouses and 4 manufacturing plants worldwide.

OUR 3 DIVISIONS PROVIDE CUSTOMERS WITH OPTIMAL SOLUTIONS FOR ALL REQUIREMENTS

| INDUSTRIAL VIBRATORS | FLOW AIDS | CONCRETE CONSOLIDATION |
|---|---|--|
| | * | |
| Electric motovibrators for vibrating equipment. | Comprehensive range of electric and pneumatic vibrators to solve any problem of flowability. | Internal and external vibrators, converters and accessories for reliable and efficient concrete compaction. |

Originally specialising in immersion vibrators for concrete consolidation, OLI is now the worldwide leader in vibration technology, with a **complete range of electric and pneumatic internal and external vibrators**.

By supplying **competitive**, **high quality products for wide-ranging applications**, OLI combines **performance** and **reliability** by adapting to the ever-changing market. A strong believer in innovation, OLI is constantly striving to be ahead of the opposition.

As a global player in industrial vibration technology, the key focus of OLI's business strategy is **rapid stock delivery, any time, anywhere in the world**. Excellent customer service is of pivotal importance: the company guarantees **quick order processing** and customers worldwide can enjoy access to the same high quality product and services.

OLI has access to credible expertise when it comes to finding suitable solutions to customers' requests. A team of engineers specialised in designing efficient, reliable, and safe solutions backed by **globally** certified management.

OLI provides their customers with stateof-the-art equipment and the blueprint for the next generation of products is already in progress.

TUATION

Due to their characteristics, many **powders** inside silos, hoppers, chutes, piping, tanks or any other container tend to **stick to the surface**.

PROBLEM

Any small change in the opening of the outlet, a rough surface, bends, shallow angles, the shape of the container, as well as the particle shape of the material handled might slow down the flow of the product, thus generating **Waste**.

SOLUTION

OLI flow aids are designed to solve issues caused by design errors or by the characteristics of the powder or granules handled. Moreover, they **increase process efficiency** and **improve plant safety**.

WHERE USE FLOW AIDS?

INDUSTRIES

- Food
- Animal feed
- Fertilizers
- Agriculture
- Pharmaceuticals
- Chemicals
- Plastics
- Cement
- Glass
- Air treatmentAutomotive
- AutomotiMining
- Recycling
- Renewable energies
- Building and construction

APPLICATIONS

- Silos
- Hoppers
- Slides and chutes
- Piping
- Dump trucks
- Silo trailers
- Tipper trucks
- Packaging equipment
- Bag unloaders
 - Compaction tables
- Threshers

BENEFITS

- ✓ Safe
- ✓ Best quality/price ratio
- ✓ Robust
- ✓ Reliable
- Easy to install
- High performance
- Increased productivity
 Global availability
- Competitive prices

SMART POWDER HANDLING

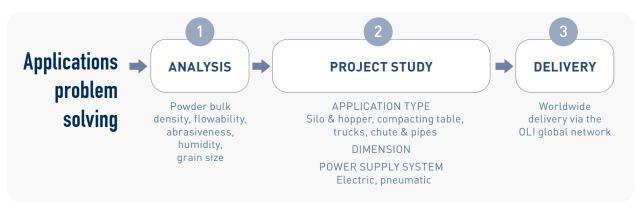

More than 60 years of **experience** in solving material handling problems make OLI the ideal partner for customers across all industries.

A **group of specialists** is at the customers' disposal to study and offer solutions that perfectly suit any type of application and material present on the market.

OLI analyses problems in the most comprehensive way: the type of powder to be handled, environmental conditions and the type of process. The **customer's needs** is at the centre of attention.

OLI's **global sales network** assists customers locally in over 70 countries ensuring ex-stock delivery from the local subsidiaries' warehouses.

OLI GUIDES YOU TO THE RIGHT CHOICE

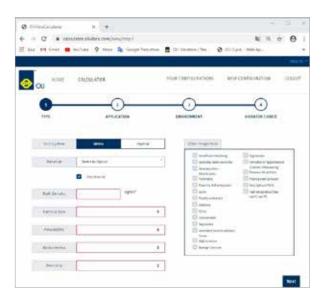

ONLINE SIZING CALCULATOR

NOT TOO BIG, NOT TOO SMALL, JUST RIGHT

To complete the service to the customer, OLI has created an application that guides to the choice of the most suitable vibrator for the project, stepby-step.

OLIVIBRA CALCULATOR - MAIN FEATURES

- Available on-line
- Real-time updates
- Multilingual platform

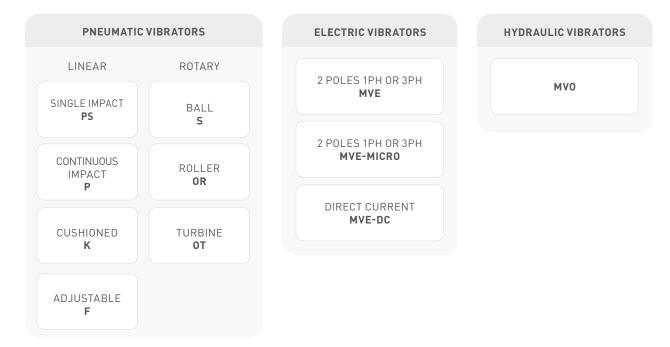

PRODUCT RANGE

INTERNAL APPLICATION => IN CONTACT WITH MATERIAL

| AERATORS | AIR JET |

OT (rotary pneumatic vibrator) - Chute on concrete mixer

RANGE OVERVIEW

AERATORS AND AIR JET

| РНОТО | SERIES | APPLICATIONS | POWDERS | FEATURES | BENEFITS |
|-------|---------------------------------|--|---|---|---|
| | BIN AERATORS VB | Silos, hoppers, pipes, dry bulk tank trailers, dry bulk rail tankers. | Suitable for dry, fine powders: Cement, lime, pigments, plastics, starch, flour, sugar, coffee. | Compatible with foods and chemicals. | Economical. Easy to install. Efficient. Durable. Available in two size: MICRO or standard. External mounting. |
| | AERATION PADS I100 | Silos, hoppers. | Suitable for dry, fine powders: Cement, lime. | Low air consumption (0.2 bar pressure). Create fluid bed. | Economical. Easy to install. External mounting kit. |
| 1 | AERATION NOZZLES U | Silos, hoppers. | Suitable for dry, fine powders: Cement, lime. | Low air consumption (0.2- 1 bar pressure). Create fluid bed. | Economical. Easy to install. Compact design. Suitable for retrofitting. External mounting. |
| | AIR CANNON PG | Silos, hoppers. | Powders of large particle size and irregular shape; fibrous powders and flakes. Wood fibres, textile fibres, paper, plastics, bran. | Compact design with integrated solenoid valve. The air blade generated by the high pressure jet helps to clean the hopper surface. | Suitable for bridge breaking. Economical. Easy to install. Low air consumption. Mounting plate included. |

PNEUMATIC LINEAR VIBRATORS

| РНОТО | SERIES | APPLICATIONS | POWDERS | FEATURES | BENEFITS |
|-------|----------------------------------|---|--|--|--|
| | SINGLE IMPACT PS | Silos, storage systems, hoppers. | Hygroscopic powders: flour, detergents, phosphates, fertilizers, lime, cement, clay, pigments. | High impact strength solves bridging or rat holing problems. Atex II3D c T85 °C (available with only pneumatic activation). | Economical. Low air consumption. Efficient. Zero impact on silo structure. Multi-voltage. Integrated solenoid valve. Timer. |
| 2 | CONTINUOUS IMPACT P | Silos, hoppers, piping, salt spreaders, dump trucks, rail cars. | Hygroscopic, humid powders: sludge, aggregates, sand, salt, foundry sand, animal feed. | Sturdy, compact heavy- duty design, high temperature applications. Atex II2G c Tx Atex II2D c Tx | Economical. Low air consumption. Efficient. Suitable for high temperature and outdoor applications. |
| | CUSHIONED K | Silos, hoppers, piping, tanks, compacting, vibrating feeders, tables and channels. | Hygroscopic or dusty powders, granules: animal feed, aggregates, plastics, foods. | Suitable for food or chemical applications. Suitable for dusty environments. Atex II2G c Tx Atex II2D c Tx | Economical. Silent. Low air consumption. Easy to install. |
| 1 | ADJUSTABLE F | Hoppers, chutes, vibrating feeders, tables and channels. | Hygroscopic or dusty powders; granules. | Alternative option to K. Compact design. Available in different shapes and casing materials. Threaded shaft for amplitude and force adjustment. Atex II2G c Tx Atex II2D c Tx | Economical. Silent. Low air consumption. Easy to install. Adjustable force and vibration frequency. |

PNEUMATIC ROTARY VIBRATORS

| РНОТО | SERIES | APPLICATIONS | POWDERS | FEATURES | BENEFITS |
|-------|-----------------------------------|---|---|--|--|
| | BALL VIBRATORS S | Silos, hoppers, piping, chutes, compacting. | Dry powders: granules, plastics, sand, ashes, cement, lime. | Filter sleeve cleaning. Suitable for outdoor use. Resistant to oxidation. Atex II2G c Tx Atex II2D c Tx | Economical. Low air consumption. High frequency vibration. |
| | ROLLER VIBRATORS OR | Silos, hoppers, piping, chutes, concrete compaction. | Hygroscopic powders: cement, concrete, sand, foundry sand. | Compact and robust design. Suitable for outdoor use. Resistant to oxidations. Atex II2G c Tx Atex II2D c Tx | High centrifugal force. Low air consumption. High frequency vibration. Suitable for high temperature. |
| | TURBINE VIBRATORS OT | Silos, hoppers, piping, chutes. | Food powders: sugar, bicarbonate, phosphate, sodium. | Suitable for food and pharmaceutical applications. Resistant to oxidation. Atex II2G c Tx Atex II2D c Tx | High centrifugal force. High frequency vibration. Lubrication free. Silent. Low air consumption. |

ELECTRIC VIBRATORS

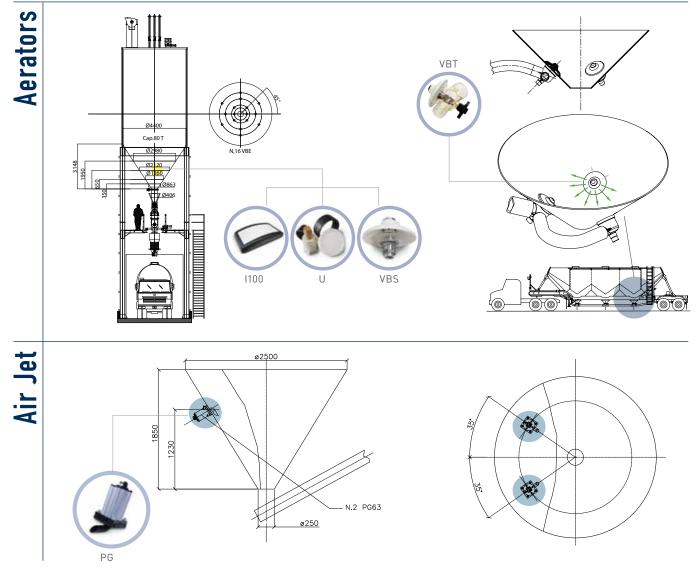

| РНОТО | SERIES | APPLICATIONS | POWDERS | FEATURES | BENEFITS |
|-------|--------------------------------------|--|---|---|---|
| | DIRECT CURRENT MVE-DC | Automotive, hoppers, salt and manure spreaders, dump trucks, concrete pump grids. | Granular powders: concrete, fertilizers, corn, soy, rice, seeds, salt, sand. | Stainless steel covers. DC Motor 3,000 RPM 12V-24V. Centrifugal force from 50 to 1500Kg. | Economical. Robust. Safe. Terminal box connection sealed (option). Adjustable force. |
| | 2 POLES MVE | Silos, hoppers, dispensers, agitators, mixers, filter cleaning, vibrating feeders and tables. | Fine and dry powders, granules: cement, flour, grit, sugar. | Suitable for indoor and outdoor use. Centrifugal force from 60 to 800Kg. Atex II2D T100 °C. | Economical. Wide range. Special windings for different geographical areas. Adjustable force. |
| | 2 POLES MICRO MVE-MICRO | Small hoppers, micro-screens, chutes, vibrating feeders tables and channels. | Fine, dry powder: plastics, sugar, bicarbonate, seeds. | Compact, uni-body, heavy-duty design. Centrifugal force from 3 to 41Kg. Atex II2D T100 °C. | Economical. Easy to install. Single phase cable with built-in capacitor. Adjustable force. |

HYDRAULIC VIBRATORS

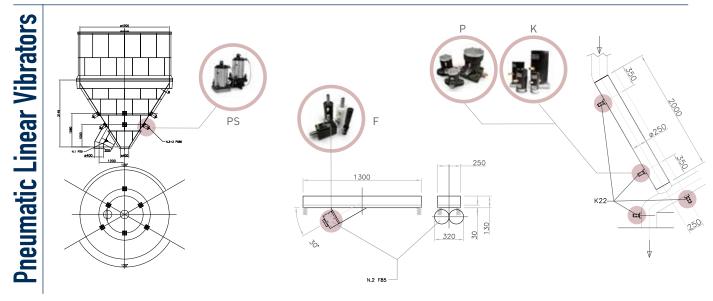

| РНОТО | SERIES | APPLICATIONS | POWDERS | FEATURES | BENEFITS |
|-------|-------------------------------------|--|-----------------|---|--|
| | HYDRAULIC VIBRATOR MVO | Dump trucks, agricultural equipment, digging buckets, pipeline padder equipment, construction equipment. | clay fortilizor | Continuous duty. Working temperature from -20 to 60 °C (from -4 to 140 °F). Centrifugal force from 208 to 830 Kg. Speed from 3.000 to 6.000 rpm. | Robust. Safe. Easy to install. Compact design. High Force. |

APPLICATIONS

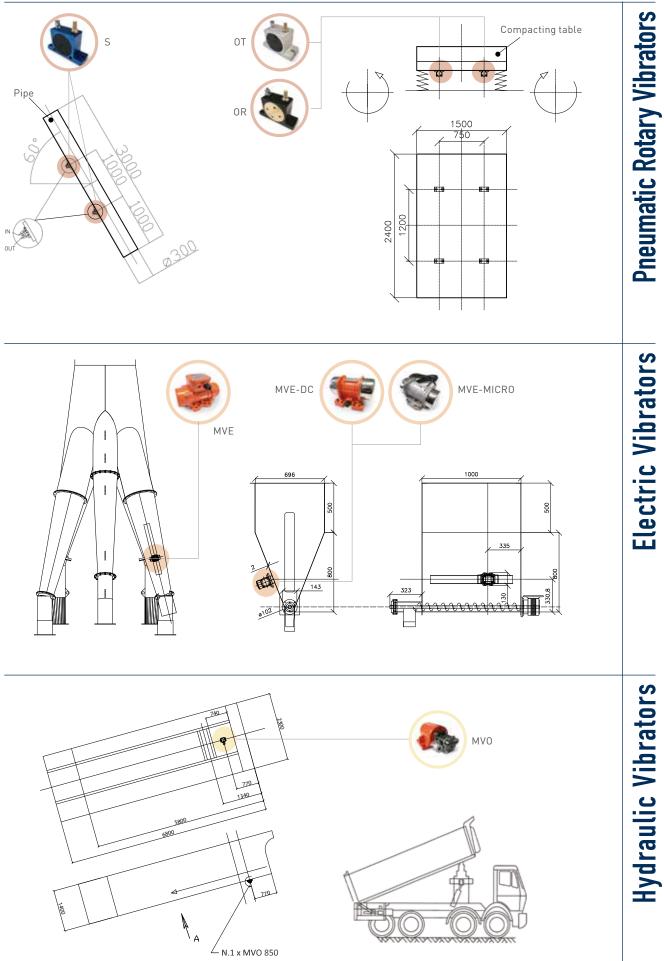

INTERNAL APPLICATIONS

EXTERNAL APPLICATIONS

EXTERNAL APPLICATIONS

I100 - Aeration pads

The I100 fluidizing plates are installed directly in contact with the material stored in the silo and are able to blow air through a porous membrane, whose semi-convex shape guarantees a wide emission angle. Low pressure aeration prevents possible product tendencies to form bridges, rat holes, lumps or deposits on the bottom of the cone.

| | AIR CONS | UMPTION | | | | |
|-------|-------------------|---------|--|--|--|--|
| Model | 0.2 bar (2.9 psi) | | | | | |
| Model | l/min* | cfm | | | | |
| 1100 | 2 | 0.07 | | | | |

* Indicates in Nl/min the total air consumption normalized at the rated pressure.

U – Aeration nozzles

The fluidization nozzles U025 and U060 facilitate the flow of material into silos and hoppers thanks to a constant injection of low pressure air.

They are a very economical solution and can be easily mounted from the outside on existing silos and hoppers.

* With l/min we indicate Nl/min so the air consumption normalized at the rated pressure.

U060 have been tested up to 3 bar in our R&D Dept. showing an air consumption of 120 l/m at 3 bar. Based on application and working condition a lower pressure is always preferable.

AERATORS

VBS – Bin aerators for silos

The range of VBS vibro-aerators is the result of years of research and development that have led to the creation of a unique and immediately recognizable product, thanks to the patented Tramontana® membrane technology. VBS concentrates the air flow more towards the outlet of the silo, considerably speeding up the discharge of the material and, therefore, reducing the unloading times and improving the productivity of the plants.

VBS - BIN AERATORS FOR SILOS

| APPLICATION | Silos, hoppers, pipes |
|-----------------|-----------------------|
| POWDER | Dry, fine, granular |
| PROBLEM SOLVING | Bridge and rat-holing |

FEATURES

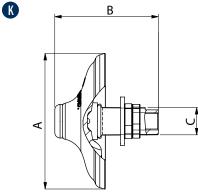

| DUTY CYCLE | Continuous or discontinuous |
|--------------------|---|
| WORKING PRESSURE | From 0.8 bar to 6 bar (from 12 psi to 87 psi) - Suggested: 4 bar (58 psi) VBS-Micro: from 0.8 bar to 2 bar (from 12 psi to 29 psi) |
| PNEUMATIC CIRCUIT | Filter + flow control valve |
| AIR SUPPLY QUALITY | Non-Lubricated (Class. 5.4.1) DR Inert Gases |
| TECHNOLOGY | Vibro-Aerator |
| MATERIAL | Silicone membrane [food grade] - FDA 177.2600, red membrane for high temperature, blu membrane metal detactable Aluminium / stainless steel stem AISI 316 [Food & Pharmaceutical grade] Polyamide body with steel ring, Supralen filter [VBSE] |

💶 PG - Air Cannon

PG air cannons prevents the formation of bridges and rat holes thanks to the high pressure air jet which is blown inside the silos or hoppers on which it is installed. The air jet is parallel to the internal wall of the silo, in this way the materials with an irregular shape, dry and light, flow down without any accumulation.

PG - AIR CANNON

| POWDER Large size, irregular shape, fibrous dust and flakes | APPLICATION | Hopper and silo |

👁 PS – Single Impact

The PS series hammers produce a high impact force thanks to a single impact between the internal piston and the metal base welded on the walls of silos and hoppers. This action is particularly effective in moving powders that tends to compact under pressure or to adhere to the walls, as well as the majority of granular and bulk materials. For this reason the PS series products represent the ideal solution to the problems of formation of bridges and mouse holes.

PS - SINGLE IMPACT - PNEUMATIC LINEAR VIBRATORS

| APPLICATION | Hopper and silo |
|-----------------|---|
| POWDER | All kind of powders and granular material, hygroscopic included |
| PROBLEM SOLVING | Bridge, rat-holing and incomplete clean out |
| | |

FEATURES

| DUTY CYCLE | Discontinuous |
|---------------------|--|
| WORKING PRESSURE | From 3 bar to 6 bar (from 43 psi to 87 psi) |
| PNEUMATIC CIRCUIT | Filter + flow control valve |
| AIR SUPPLY QUALITY | Class 5.4.1. |
| WORKING TEMPERATURE | From -20 °C to 80 °C (from -4 °F to 176 °F) |
| MAX NOISE LEVEL | 125 dB(a) |
| TECHNOLOGY | Single impact |
| MATERIAL | Aluminium body, steel attachment plate, aluminium head |

P - Continuous Impact

The pneumatic vibrators of the P range produce an extremely high linear impact force. This is possible thanks to the impact of a piston, positioned inside the body, on the metal base welded directly on the external wall of the hopper. P are extremely effective in preventing the formation of scale, bridges, mouse

holes, lumps or deposits of material on the walls.

LINEAR

AIR JET

In pneumatic vibrators K series, the vibration is generated by the linear movement of a floating piston without impact between the internal surfaces.

They represent an excellent solution to rat holes as well as for internal applications that require a noise level below 80 dB (A).

AIR JET

The pneumatic vibrators of the F range generate linear vibration thanks to the movement of a floating piston. To meet different application needs, the F series is available in various shapes, sizes and materials. It is possible to apply additional masses to the piston in order to modify the frequency and the force developed.

F - ADJUSTABLE - PNEUMATIC LINEAR VIBRATORS

| APPLICATION | Vibrating feeder - table and channel |
|---------------------|--|
| POWDER | Hygroscopic - dusty and granular |
| PROBLEM SOLVING | Bridge and rat-holing - detaching and compacting |
| FEATURES | |
| DUTY CYCLE | Continuous |
| WORKING PRESSURE | From 2 bar to 6 bar (from 29 psi to 87 psi) |
| PNEUMATIC CIRCUIT | Filter + flow control valve + lubrication + 3/2 ways valve N.C. |
| AIR SUPPLY QUALITY | Class 5.4.4. |
| WORKING TEMPERATURE | From -20 °C to 200 °C (from -4 °F to 392 °F) F15P - from -20 °C to 100 °C (from -4 °F to 212 °F) |
| MAX NOISE LEVEL | 80 dB(a) |
| TECHNOLOGY | Adjustable piston |
| ATEX | II 2D c Tx II 2G c Tx |
| MATERIAL | Grey cast iron body(powered painted) F15P: nylon body and aluminium cover F18: aluminium body (square shape) |
| | |

AIR JET

In the OR series, high frequency vibration is generated by a roller that describes an epicycloidal movement inside two housings made of hardened and ground steel. The OR series is characterized by high speed, great centrifugal force (up to 783 kg) and low air consumption.

👁 OT – Turbine vibrator

The OT generate a high frequency vibration due to rotation at high speed of a turbine with integrated masses.

Compared to the S (ball) and OR (roller) series, the OT

series is quieter and has a higher rotation speed thanks to the presence of bearings, developing centrifugal forces of up to 781 kg.

ERATORS

+

MVE-DC – Direct current electric vibrators

The MVE DC electric vibrators consist of an electric motor (12 or 24 volts) housed in a robust aluminium casing, with eccentric weights mounted on both ends of the shaft.

The MVE-DC is designed for concrete mixers and other industrial or agricultural vehicles, capable of withstanding harsh environments.

MVE – 2 poles electric vibrators – Three Phase

Electric vibrating motors for general applications in various industrial sectors on vibrating tables and silos and hoppers. Available in 2 poles 1ph and 3 ph, as well as in direct current with different voltages, they are suitable for use with inverters (variable frequency drive) and have a centrifugal force ranging from 20 to 800 kg, adjustable on each individual model.

Being the amplitude of the vibration inversely proportional to the speed on rigid structures like silos or hopper a 2 poles MVE is preferred to avoid damages to the welding points.

MVE-MICRO - 2 poles electric vibrators

The MVE-MICRO external electric vibrators are characterized by their small size and consist of an electric motor housed in a robust aluminium body, with eccentric weights mounted on both ends of the shaft.

They fit into small vibrating equipment or hopper though ensuring a significant centrifugal force.

👁 MVO – Hydraulic vibrators

The MVO vibrator generates a high frequency rotational vibration thanks to the hydraulic system that activates an eccentric mass.

They are very resistant and easy to install. They do not require any electrical or pneumatic connection but only the hydraulic one.
